a) ¹This have been classified as assets held for sale.

b) ²On 9th March, 2026 the Hon'ble National Company Law Tribunal, Chennai Bench ("NCLT") has approved the Scheme of Amalgamation entered into by INDIACEM, with ICL Financial Services Limited (ICLFSL), ICL International Limited (ICIL), ICL Securities Limited ("ICLSL") and India Cements Infrastructures Limited ("ICIL"), wholly owned subsidiaries of the INDIACEM ("collectively Transferor Companies") (hereinafter referred to as "Scheme" or "Scheme of Amalgamation") under Sections 230 – 232 of the Companies Act, 2013. The Order has been filed with the Registrar of Companies, Chennai, Tamil Nadu and the Scheme has been made effective from 28th March, 2026.

The Appointed date of the Scheme is 1st January, 2026. All assets and liabilities of ICLFSL, ICIL, ICLSL and ICIL stand transferred to IndiaCem from the Appointed Date and all four companies, viz. ICLFSL, ICIL, ICLSL and ICIL stand dissolved without winding up. Since the amalgamated entities are under common control, the accounting of the said amalgamation in the Company's Standalone Financials has been done applying Pooling of Interest method as prescribed in Appendix C of Ind AS 103 'Business Combination'.

c) All numbers are reported in crore only where currency symbol is given it is in absolute numbers.

d) For converting the figures given in foreign currency appearing in the accounts of the subsidiary companies into equivalent INR, following exchange rates are used for ₹1.

¹Ceased to be Associate of ICEM from 2nd December, 2025

For and on behalf of the Board of Directors	
K. C. Jhanwar Managing Director DIN: 01743559	Vivek Agrawal Wholetime Director DIN: 10599212
Atul Daga Chief Financial Officer	Dhiraj Kapoor Company Secretary
Mumbai: April 27, 2026	

ANNEXURE V

Disclosure of Particulars with Respect to Conservation of Energy, Technology Absorption and Foreign Exchange Earnings and Outgo as Prescribed under Rule 8(3) of the Companies (Accounts) Rules, 2014.

A. CONSERVATION OF ENERGY:

a) Steps taken or impact on the conservation of energy

- Air-cooled condenser (ACC) mist cooling technology to maintain ambient inlet air and effective cooling to improve turbine performance.
- Energy efficient pulse valve for bag filter purging for power saving.
- Energy efficient Electronically Commutated (EC) fan for Air Handling Units (AHU) system.
- Installation of Cermet dip tubes in the bottom cyclones to reduce specific heat consumption.
- Introduction of energy saving grade brick for kiln, both in basic and alumina quality to reduce heat losses from kiln radiation.
- Cyclones and ducts modification with analysis to reduce pressure drop, to reduce energy consumption, improve process efficiencies.
- Cooler modification to increase cooler performance as well as help to reduce specific heat and power consumption through CFD analysis.
- Calciner modification for maximisation of percentage of Thermal Substitution Rate (TSR).
- Internal benchmarking of data for all milling and pyro processing and circulating to units to create awareness regarding their respective position, thereby strive to improve the Key Performance Indicators (KPI).
- Timely change of non-efficient process fans to improve efficiency.
- Timely replacement of old reciprocating with screw compressor to improve efficiency.
- Secondary firing in SLC kilns to reduce specific heat consumption.
- Lime stone crusher output size optimisation to improve overall power at Raw mill & Clinkerisation.
- Digitalisation initiative to fine tune operation with PID's and optimise productivity.
- Enhancing Turbine Heat Rate by Steam Flow Path modification by Turbine Revamp with Highly Efficient twisted blade profiles, Improved design of Guide Blade Carrier & steam inlet valves, Heat rate improvement up to 7 to 8%.

- Energy Efficient Technology in ACC Fan blade, Carbon Fibre Reinforced Polymer (CFRP) fan blade technology has emerged as a high performance alternative offering substantial operating cost reduction through power savings over traditional GFRP blades, Guaranteed Power Savings of 35%.

b) Steps taken by the Company for utilising alternative sources of energy

- The Company has prioritised and is using various waste materials as substitute for fossil fuels in its kilns and TPP.
- The Company has identified different sources of raw material as substitute of traditional correctives for raw mix design.
- Use of waste industrial material as gypsum in place of natural or mineral gypsum.
- Significant investment is made to improve infrastructure for safe handling, storage, testing, pre-processing and usage of waste materials as an alternative energy source and is being augmented at plants in a phased manner.
- Continuing installation of Waste Heat Recovery Systems ("WHRS") to generate the energy by utilising the hot waste gases from the pyro process at cement plants and reducing carbon footprints significantly.
- Increased utilisation of renewable energy sources, mainly solar power, at most operational locations.

c) The capital investment on energy conservation equipment

- During the year, your Company has invested ₹ 4,041 lakhs on equipment or various capital schemes for conserving the energy resources.

B. TECHNOLOGY ABSORPTION:

a) Efforts made towards technology absorption

- Oil filled reactor to advanced technology dry type reactors for capacitors to ensure safety and reduce cost.
- Conventional Motor Control Center (MCC) to intelligent MCC to improve reliability and reduce motor failures.
